Dear Chief Marilyn Baptiste;

Please accept this letter of support from the Tseycum First Nation Chief and Council. When we first viewed your video regarding the continued desecration of your lands we were appalled that the government still ignores the concerns of First Nations people in favor of large companies.

The purposed draining of Fish Lake for waste storage and the use of Fish Creek and Little Fish Lake as tailing impound areas is too horrible to contemplate. We are all aware of the potential impact on the watershed and the potential impact on the salmon bearing rivers.

We would like you to know that the Tseycum First Nation does not support the Taseko mining company's plan and are extremely opposed to any development that has such a terrible impact on the environment.

Therefore Tseycum First Nation requests that the Ministers responsible amend the Fisheries Act and stop the destruction of lakes and rivers by mining companies.

Yours sincerely,

Chief Vern Jacks
Tseycum First Nation

Cc: Minister Prentice
